

Comprehensive EEG & Session Analysis Report

✓ Session audio transcribed and analyzed

Before Treatment EEG

After Treatment EEG

Before Treatment EEG Analysis

After Treatment EEG Analysis

Technical EEG Analysis

EEG Band Power Analysis Report
This report compares EEG band power measurements before and after treatment.
Dataset Summary:
- Before Treatment: 9 recordings with 2 parameters
- After Treatment: 9 recordings with 2 parameters
Frequency Band Changes:
Clinical Significance:
Changes in EEG patterns may indicate neuroplasticity and treatment response.
Further clinical correlation is recommended for comprehensive assessment.

Session Summary & Clinical Insights

Session Transcription Analysis:

The session transcription has been recorded and provides valuable context for interpreting the EEG changes observed in this treatment session.

Key Observations:

- Session content documented for clinical review
- EEG changes should be interpreted in context of session activities
- Transcription available for detailed clinical analysis

Session Transcript Length: 4 words

Recommendations:

- Review session content alongside EEG patterns
- Consider session-specific factors in treatment planning
- Monitor patient engagement patterns in future sessions

Report generated on: August 06, 2025 at 04:21 AM
